THE MDYA360's PURPOSE

<https://vimeo.com/164279495>

WHY THE MDYA360 MATTERS

THE NUMBERS

- 20% of America's Youth have a diagnosable mental illness
 - Over 14.7 million
- A high percentage of these children are prescribed powerful medications
- Millions of youth are in and out of foster care, juvenile justice, psychiatric hospitals, & residential care settings

THE FUNCTION

- Effective & Efficient Monitoring of Treatment Response is essential to understanding the effectiveness of our interventions
- Youth, Caregivers & Staff/Clinicians all have valuable perspectives to offer

THE MDYA360 MEETS THE NEED

WHAT

What are our youth experiencing?

- Trauma
- Behavioral Disruption
- Emotional Distress
- Substance Use
- Socially-based Problems

WHY

Why are they in distress?

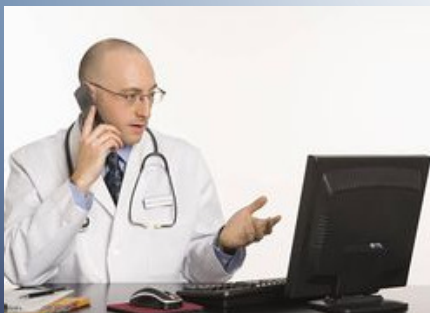

- Is it related to educational difficulties?
- Is it related to inadequate interventions?
- Is it related to family dysfunction?
- Or the community they live in?

WHAT'S NEXT

What do these young persons (and their caregivers) need to be more successful?

- More applied continual data collection to determine the durability of success
- Insights to determine best course of treatment and support

THE MDYA360 MEETS THE NEED

- ➔ No system exists currently in the at-risk youth sector, which collects the array of outcomes needed to truly inform treatment and document accountability.
- ➔ No measurement exists that measures how the youth are doing psychologically, behaviorally and emotionally, while also providing an organizational 360 degree assessment of the environments they are being treated or cared for within.

And even the few assessments that do exist, do not have **Qualtrics** technology powering their efforts!

CREATING A MORE COMPREHENSIVE APPROACH

THE MDYA360 COLLECTS, CONNECTS AND DOCUMENTS EVIDENCE OF PROGRAM EFFECTIVENESS, YOUTH WELLBEING, SAFETY ISSUES AND THE MANY OTHER FUTURE ACCOUNTABILITY DEMANDS...

*The MDYA360 is
An Outcomes Monitoring System
For Use In At-Risk Youth Sectors Such as...*

Children and Family Services

**Juvenile
Justice**

**Foster
Care**

**Psychiatric
Inpatient**

**Residential
Treatment**

The Multi-Dimensional Youth Assessment Framework and Focus

The MDYA Provides a Comprehensive Multi-Dimensional 360 Degree Evaluation of Perceptions and Behaviors by Surveying Youth, Parents, Guardians and Staff.

Multi-Dimensional Youth Assessment by Dimension & Scale				
MDYA Dimensions	DIMENSION 1: Facility Climate & Environment	DIMENSION 2: Youth Wellbeing	DIMENSION 3: Behavioral Risk Factors	DIMENSION 4: Educational & Parent Support
